
The spirit of Apple's is pirates

Posté par trade - 18-01-2010 à 03:40

Go to Apple to work on the first day, the sun was shining, I got on, took out his own report to the book a look, startled, work place is actually a commercial bank. I was a bit puzzled nike air yeezy, why not at Apple's headquarters to work? Apple Is Moving, and moved to banks gone?

Came to banking, I am careful to ask questions of security, "Will Apple go from here is it?" Security pointed to the back door.

It seems no wrong! Go to the bank back door and found that really is a Journey Into Amazing Caves, on the second floor, a small door, before the door, there is a cheap jordans, a number of young people are dedicated to playing with the computer. It turned out that we really are in the bank behind a small building to work in secret. Apple's product R & D are mostly in secret, we hope that when the listing allows all of the people "surprised" and "Stunning" and therefore office space is very secretive.

"This is perhaps a reflection of the spirit of Apple's pirate it." I thought. Apple's so-called "pirate" spirit, I always have heard about. Apple, the company's creed is: to conduct their own invention, do not care about how people say one person can change the world. The beginning company founder. Jobs in the roof of the pirates hoisted a giant flag to show the world declared: I am different.

My voice recognition where the project team they were staffed by young people, I was 28 years old, there are some even smaller than I, they are the elite of the nation's software industry, they love and pass the apple pirate culture air yeezys shoes. Soaked in apple of their relaxed culture, a group of cool and lovely people. They often bring pets into the office to, when you write programs, do not know who the dog will come Minato your feet smell a smell, there is time air yeezy, a colleague raised rabbits and even jump to my keyboarding hands. At that time, the office piled all kinds of pet food, who is available who will have to feed a feed pets.

Since the school has done a study for too long, then my views on how to do a real product in a quandary, is that they gave me enthusiasm to help, let me rest on its laurels from the academic community where freed.

coach bags was a small circle of true harmony.

It's almost the happiest in my section of Apple's time: from July 1990 to February 1991, at Apple, no one to manage us, our passion and imagination has played to an extreme. We do not want to go home after work, but immersed in their own research, we hope as soon as possible to achieve breakthroughs in their respective

cheap coach bags. Meanwhile, Mac's speech recognition 40 times faster, but also achieved a good recognition rate.

After several months of effort, Mac b project has a number of breakthroughs.

We wholeheartedly into Mac b R & D time, Apple into a financial crisis.

Now we can see that Apple's mistakes. In the Scully years in charge of Apple, coach outlet had the technology along the direction of forward inertia of drifting in 2078, the company's stock is also way up, unfortunately, Scully has never found Apple's real development. Have launched a new project, not the company actually has thousands of items, but in the PC market, Apple has been Microsoft squeezed the space was getting smaller and smaller.

Apple has always been a high-end and do not adhere to the principle of openness, the corresponding, Apple's market share has been shrinking. As a result, Scully thought, simply using price reductions to hold market share, jordan shoes move to Apple's market share steadily declined, but the consequences of price cuts can only lose money. Finally, Apple can only rely on layoffs to cut costs.

Apple's restructuring of the tide, our team was canceled, but the voice recognition technology has been retained because it is one looks very cool technology. Under pressure from the board, Scully is in fact prepare for the worst - to find a buyer to take over Apple, while the voice recognition technology, it seems is a good selling point.

Company executives to make these decisions, I have also been kept in the dark. Until one day I will be back to the office to open end and see Dave Nagel is sitting in my chair, with his trademark smile, said hello to me and said: "Kai-Fu, I am there is a good news and bad news, you would like to listen to this? "I was surprised mind, thought, said," or to hear the first bad news for it. "Dave said," you have to do project was stopped, and that your Mac b group was canceled. "my heart burst of frustration, strong drum up the energy question. "That's good news then?" "The good news is that you promoted to ATG team manager of research and development group voice." I Startled, air jordan shoes "What? Little management experience, but I do not have ah!"

"You sort of person they have the trust of everyone around you people are saying very much like to work with you, so I am sure you have management potential. Also, I can help you find a new boss - Shane Robinson (ShaneRobi - son), he is our most excellent manager, you will not, and he can teach you. "

So I unwittingly pulled on the manager's seat. Proof. As Dave promised, Shane indeed is a very good leadership. I learned a lot from him. Today, he is chief technology officer of HP.
